- USDA et Cattlefax

Short term outlook

- After an encouraging spring recovery, the cattle market is starting to run out of steam due to the seasonal decline in demand.
 - Carcass weights have dropped by around 10 lbs in recent weeks. However, marketed cattle are still heavier than normal at this time of year.
 - Despite the fears of a fourth wave of COVID-19 contamination, resumption of food services across the country is expected to strengthen demand.
-

Long term outlook

- Beef cattle herd contraction is underway in United-States which should have lead to less beef production and somewhat firmer prices.
 - However, due to technical constraints (social distancing and labour issue), the slaughterhouses are still operating below pre-COVID levels.
 - Rising exports to Asia, accelerating COVID vaccination campaigns and tightening beef supply are expected to support the market in the medium to long term.
