

## Vaccination program

Calves must be vaccinated against the following:

- Infectious Bovine Rhinotracheitis (IBR)
- Parainfluenza 3 (PI3)
- Bovine Respiratory Syncytial Virus (BRSV)
- Bovine Viral Diarrhea (BVD)

Calves marketed must be vaccinated according the following vaccination program:

**Modified live vaccine (1 dose):**

Administered to a calf at least 5 months of age, between 2 weeks and 4 months prior to the sale.

The maximum allocated time between the date of sale and the date of vaccination is 4 months.

The withdrawal period applicable to the vaccine is 21 days.

The veterinarian's recommendations must be followed at all times.

## Important

Only the modified live vaccine is included in the vaccination program.

This is to be administered to calves at least 5 months old.

## Check only if applicable

- My farm is certified VBP+.
- The breeding herd is vaccinated annually.
- I would like the name of my farm to be displayed when my animals are put up for sale.
- I certified that the calves targeted by this statement have not received growth hormones<sup>1</sup> or any other growth factor (ionophores<sup>2</sup>, antibiotics<sup>3</sup>) or antibiotics as a preventive measure since birth<sup>4</sup>.

<sup>1</sup> Growth hormones: Ralgro, Component, Compudose, Revolor, Synovex, MGA.

<sup>2</sup> Ionophores: Rumensin, Bovatec, Posistac.

<sup>3</sup> Chlor-100, Auréo S-700, etc.

<sup>4</sup> Any injectable or oral antibiotic in the absence of fever.

Should you have any questions, ask your veterinarian or your animal feed advisor.

I authorize Les Producteurs de bovins du Québec to take biological samples from my calves for study and verification purposes.
